Author's note:

Public opinion is always politician's opinion!

100 politicians of world hate a man for "some reason".

1000 million public of world also start hating him, but for "no reason!"

People do that because of herd instinct! they don't care! and they don't know any better.

What is locally prevalent is blindly followed!

We write due to inspiration, creativity being

We justify the right to write because world is already filled with hate literature!

Anti-semitic amateur painter's books are bestsellers!

Deranged barbarian babblings encouraging bloodshed are holy books!

Hence our right to write.

1. We write for the free thinkers of the world present, uncorrupted by herd instinct and political affiliations!

2. We write for the future generations.

Who knows? Maybe sometime somewhere someone down the line might find our writings pertinent and true.
